Centroid's disaster recovery as a service (DRaaS) offers a more friendly OPEX pay-as-you-go opportunity to very quickly implement an industry-leading DR Solution on Oracle Cloud. It enables businesses to pay for what they use, thereby significantly reducing cost. In the event of a disaster, it serves as a secondary infrastructure enabling replication of cloud data and applications allowing the ability to scale up rapidly and securely to meet your disaster recovery needs.

benefits

- **Seamlessly create an Oracle Hybrid Cloud DR Solution** by connecting your on-premise database to Oracle Cloud
- **No Data Loss** – data is replicated in real-time
- **Fast Failover** – your database is immediately accessible in the Oracle Cloud
- **Extreme Performance Architecture** – allows your business to meter-up as well as meter-down based on your DR needs
- **Fully-automated monitoring and alerting**
- **Ensure compliance** with enterprise data governance initiatives and government regulations such as GDPR

speed + flexibility

With our OPEX friendly pay-as-you-go option you can create an industry-leading disaster recovery solution in minutes. No CAPEX hardware, datacenter and DR maintenance costs.
