SYNCHRONIZE, SCALE, AND SUCCEED WITH KUBERNETES

A Vision for an Enterprise Kubernetes Platform

Our team can deploy a standard, enterprise-grade Kubernetes platform on the cloud provider of your choice (or on-premises) built to meet your compliance and security requirements. We have the tools to help you onboard applications to Kubernetes quickly, including premade container images, helm charts, and CI/CD pipelines. In short, we provide more than some CI/CD pipelines – we offer a platform to run your business!

Deploying Your Cluster

We will deploy your cluster with Terraform and then install a suite of monitoring, security, and compliance tools to ensure your cluster and its applications are secure and monitored 24/7.

Migration of Your Apps

We can assist you in migrating your applications by leveraging our extensive Kubernetes experience, along with our pre-made container images and helm charts.

We will work to standardize them where possible, delivering you with a true platform, not just a CI/CD pipeline.

Supporting Your Team and Environment

Once we have migrated and cut-over your applications, we will provide the following support as needed:

- Training for developers and staff
- Regular monitoring and upgrades
- 24/7 on-call support
- Fractional staff augmentation to support ongoing software development and initiatives.

ABOUT CENTROID

Headquartered in Troy, Michigan, Centroid is a provider of managed cloud services and enterprise workload consulting services across the major Hyperscalers. With expert resources throughout the United States, South America, and India for 24/7 support, the company employs roughly 450+ people. Centroid is recognized at the highest level of alliance relationship with Oracle for nearly 25+ years and is one of Oracle's leading cloud service providers in North America. In addition, Gartner has recognized Centroid in 2021, 2022, and 2023 in their Market Guide for Oracle Cloud Infrastructure Professional and Managed Services.
